

BONE BANK ALLOGRAFTS

Our Mission is...

To promote donation through public awareness education in alliance with other Organ and Tissue organizations.

To enhance the quality of patient care by providing only safe, high quality allograft tissues to health care professionals for both transplant and research.

To establish, maintain and constantly update materials, methods and standards for the procurement, processing and distribution of allograft tissues.

To create new and innovative allograft tissue grafts that fulfill a surgical need.

To ensure that all transplant recipients receive the highest quality and safest tissue grafts possible at all times.
